

Feedback points -

1. Reduce the length size of all boxes on the home page (tabs)

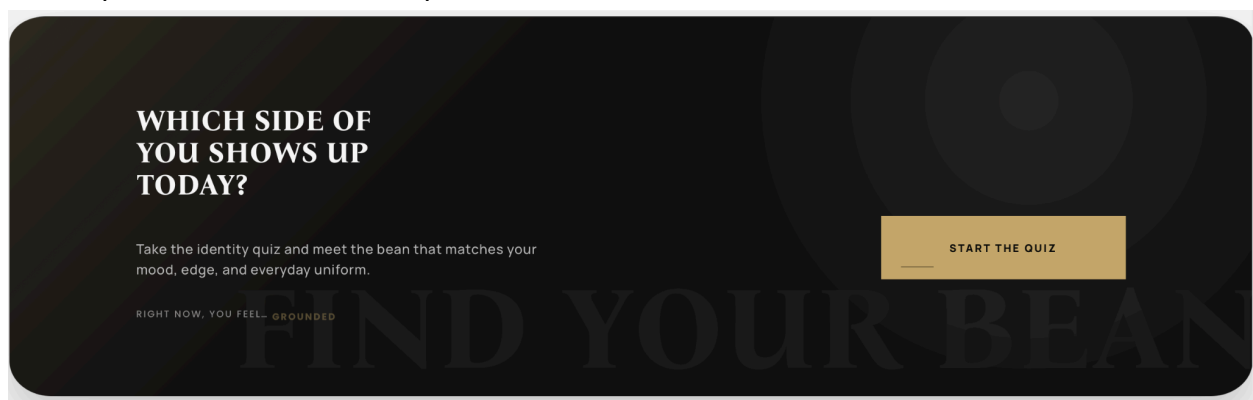

Example given below - I have only shared 2 images but we need to reduce the size of all boxes

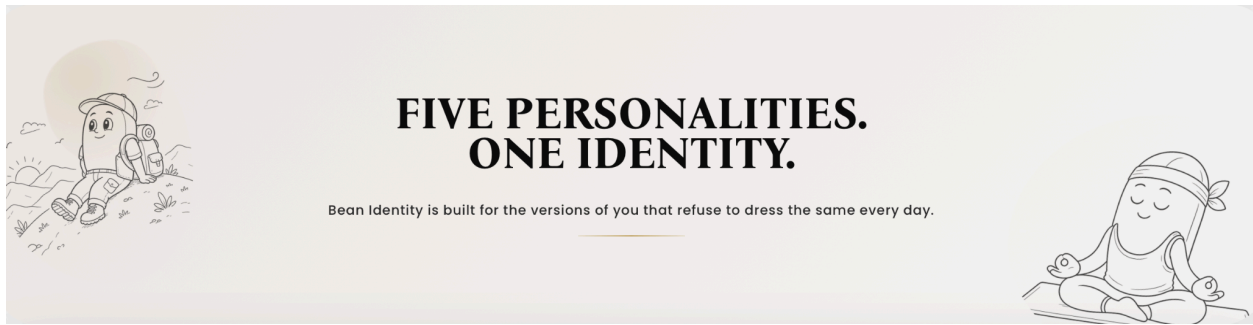

2. Reduce the font size across the website

3. Use small caps throughout the entire website. Headlines should also be in small case. Only CTA to be in upper case

4. Reduce the length size of quiz box. Remove the first line (Which side of you shows up today). And Replace the word start the quiz with "FIND YOUR BEAN"

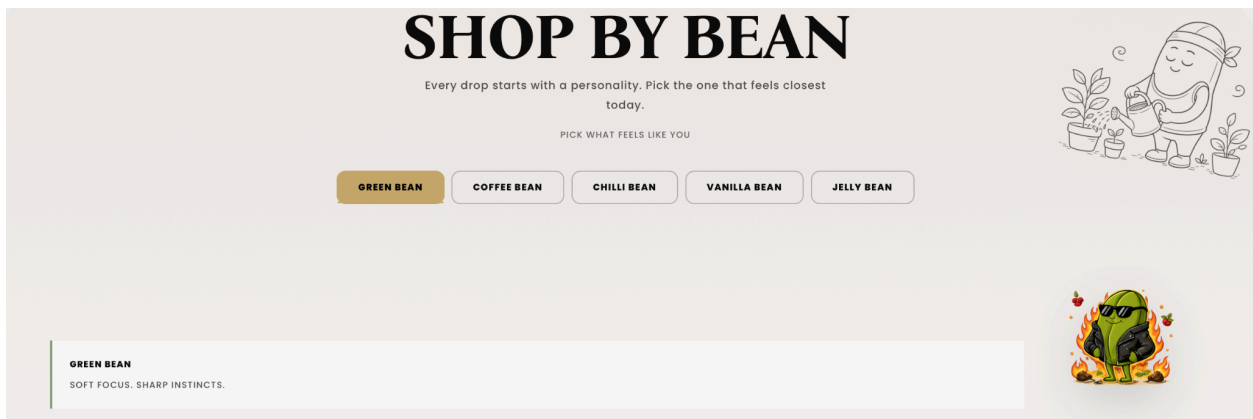

5. remove five personality box

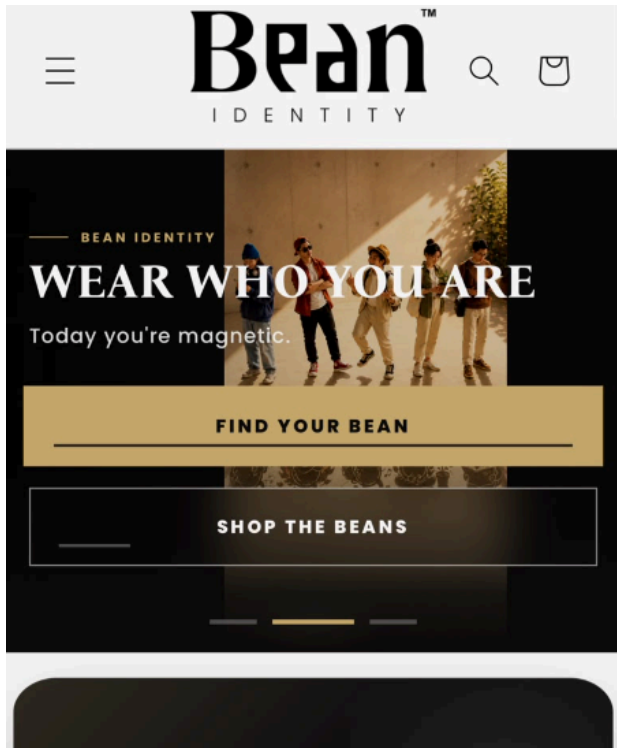

6. the bean stories need not be this elaborate. keep the lines limited to 2 or 3, with a prompt to click. On clicking it should go to a new page of the entire bean story session.

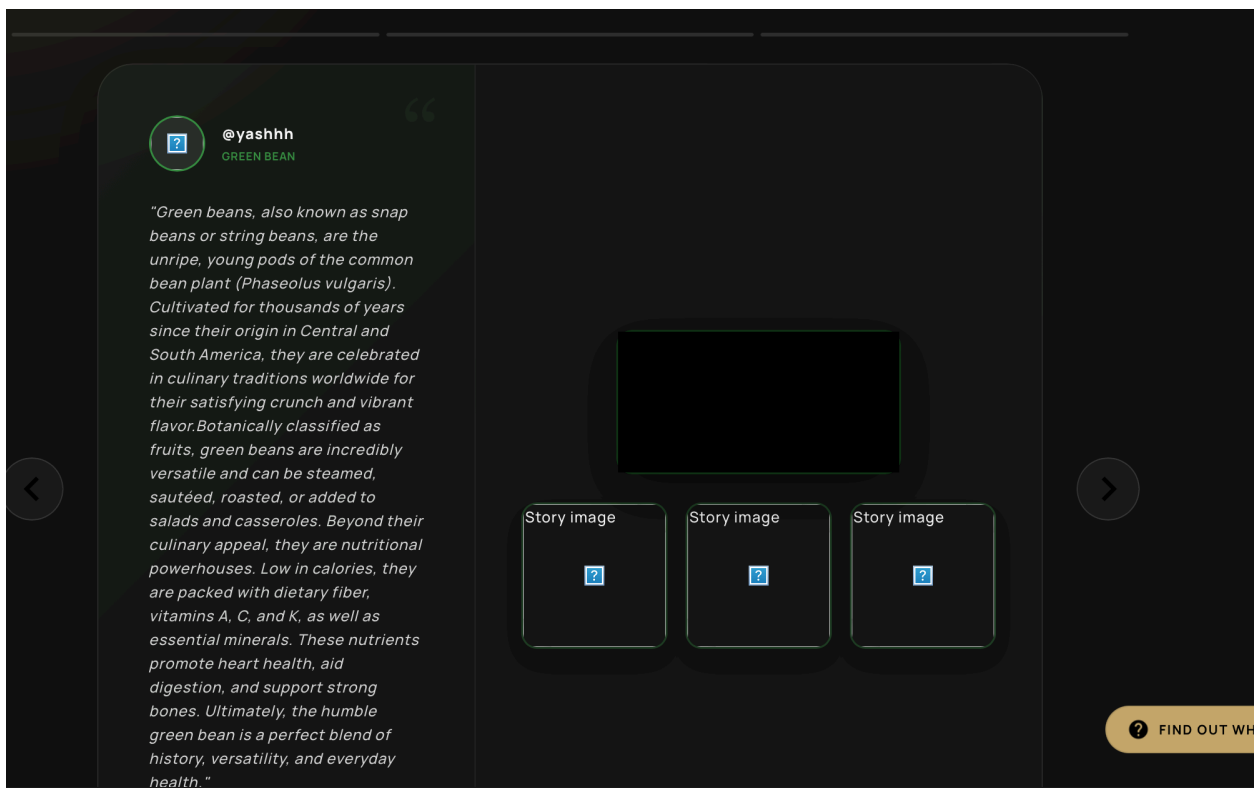

8. shop by bean alignment can be more towards the Center of the box and slightly more down

9. hero banner is disproportionate in mobile view

10.

Why is this showing like this?

If there are no images and videos uploaded by the person then let's not show it altogether

In bean stories i want to make a provision where only the first 2-3 sentences of the story is visible then we have an option of read more, and when the user clicks on it then the full story is visible
